The present invention relates to a system for providing a user with a graphical user interface (GUI) for a computer system. The GUI is designed to allow the user to interact with the computer system in a simple and intuitive manner. The GUI includes a main window that displays a list of files and folders. The user can select a file or folder and perform various actions such as opening, deleting, or moving it. The GUI also includes a search bar that allows the user to search for files and folders by name or type. The GUI is designed to be easy to use and to provide a high level of functionality.
